up to 500 meters from your vehicle ...

**...your own License Free, Exclusive, AES Secure,
Handsfree Local Talkaround Channel** *with host mobile radio access.*

Introducing ...

Handsfree Talkaround - this truly changes everything

IWCE 2018 Florida marks the release of the Handsfree series Elite X10DR. The newest X10DR release uniquely now* features the capability for up to three handsets to **operate simultaneously** from a single gateway connected to your host mobile radio. That's quite a breakthrough but...

X10DR Elite can now **also** be factory ordered with **user selectable, full duplex, handsfree talkaround** capability! This Wireless Pacific's latest technology breakthrough is set to revolutionize on-site communications for every two way radio equipped vehicle which carries two or more personnel to their tasks at hand.

- Two Police officers responding to a crime scene will be able to in **real time** communicate every nuance of their surroundings to their partner, totally handsfree, whether jumping a fence, apprehending a suspect or engaging in return fire. Now that's backup.
- Three paramedics fighting to save a driver and passengers lives at a horror auto accident can now use both hands to do what needs to be done, while communicating constantly with their partners.
- A fire appliance's crew of five can arrive on-scene and immediately start securing the area, rolling out and connecting hoses, starting pumps, manning the hoses and fighting the fire, while seamlessly communicating to their fellow crew, all totally hands free - even in the noisiest of environments.
- Electrical Utility workers up in a "bucket" will be free to use both hands with safety while communicating critical information with their groundman or an adjacent lineman even in the stormiest of tempest.

In fact, every X10DR Elite multi handset user with handsfree operation, can now significantly benefit from having their own **totally license free, private and exclusive[#], AES secure, local talkaround channel**, where they can effortlessly communicate amongst themselves - totally handsfree - while still being able to listen to all traffic on their vehicle's mobile radio and can respond with the press of the handset's PTT button. To borrow a well worn adage....this changes everything! Now think what your team could do with it....
